Jev vs Claude Decision Comparator

One context, one classification contract, two model paths.

Sample ticket

T012 - Technical failure rather than account administration

Load sample

Shared context

Password reset emails arrive, but the link opens a blank page.

Shared classification questions and reference answer

Field	Question	Answer shape
route	Which team should handle the ticket based on its primary intent?	billing, technical, sales, account, other
urgent	Does the ticket indicate a time-critical business impact, an active outage, a hard deadline, or an explicit need for urgent attention?	Yes probability (0-1)
refund_requested	Does the customer explicitly ask for money to be returned?	Yes probability (0-1)

☐ Score against reference answer

Expected route

technical

☐ Expected urgent

☐ Expected refund request

Run comparison

Jev

Field	Result	Probability	Confidence	Rationale
Route	Technical	-	45%	Jev returned route probabilities: technical
Urgency	No	14%	72%	Jev returned 14% yes probability for urgency
Refund requested	No	1%	98%	Jev returned 1% yes probability for refund
