Jev vs Claude Decision Comparator

One context, one classification contract, two model paths.

Sample ticket

T027 - General company question

Load sample

Shared context

Do you have an office in Singapore?

Shared classification questions and reference answer

Field	Question	Answer shape
route	Which team should handle the ticket based on its primary intent?	billing, technical, sales, account, other
urgent	Does the ticket indicate a time-critical business impact, an active outage, a hard deadline, or an explicit need for urgent response?	Yes probability (0-1)
refund_requested	Does the customer explicitly ask for money to be returned?	Yes probability (0-1)

☐ Score against reference answer

Expected route

☐ Expected urgent

☐ Expected refund request
