Jev vs Claude Decision Comparator

One context, one classification contract, two model paths.

Sample ticket

T007 - Technical outage despite payment language

Load sample

Shared context

We cannot process any customer payments in production. This is blocking checkout for everyone.

Shared classification questions and reference answer

Field	Question	Answer shape
route	Which team should handle the ticket based on its primary intent?	billing, technical, sales, account, other
urgent	Does the ticket indicate a time-critical business impact, an active outage, a hard deadline, or an explicit need for urgent attention?	Yes probability (0-1)
refund_requested	Does the customer explicitly ask for money to be returned?	Yes probability (0-1)

☐ Score against reference answer

Expected route

technical

☐ Expected urgent☐ Expected refund request

Run comparison

Jev

Field	Result	Probability	Confidence	Rationale
Route	Technical	-	64%	Jev returned route probabilities: technical
Urgency	Yes	96%	92%	Jev returned 96% yes probability for urgency
Refund requested	No	2%	96%	Jev returned 2% yes probability for refund
